Harbour planning Winter 2018 - 2019

Planning moorings in a harbour is a complicated jig-saw puzzle. To optimize the harbour to maximum efficiency, we ask that you dock the ship at the mooring that harbour services has allocated to you. Your mooring can be found on our website: <http://havenarnhem.hbbh.nl/>.

You can also contact us by phone +31-263775510 and/or email haven@arnhem.nl

Last year, we made the following impression: [Film Harbour](#)

Winter renovation of ships

It is strictly forbidden to carry out conservation work to the exterior of ships in our harbour or quays. Small repairs may be undertaken, using tarps to prevent paint, sanding media, and debris from polluting air and water resources. Use vacuum sanders to remove paint from hulls and to collect debris during sanding. Vacuum sanding should not occur over water. RWS (Rijkswaterstaat - Dutch Water Authority) have raised concerns about this and will be checking accordingly.

Generator Prohibition

We receive many complaints from nearby residents about the noise and stench of diesel generators. To help alleviate this problem, we have installed shore power units on the Nieuwe Kade, and the coming winter of 2018/2019, we are planning to install a small number of shore power units in the Nieuwe Haven. Per 1 January 2018, the municipality of Arnhem has invoked a generator prohibition, which bans the use of using on-board generators at moorings where shore power is available.

Park-line Aqua App

As of the 1st of august 2017, we were the first harbour in the Netherlands to use an App as the method of payment for harbour fees and electricity. This has been realised in cooperation with Park-Line Aqua. You can use the app via smartphone or tablet, and also via www.park-line.nl/water if you are using a pc. The registration process is virtually the same as for the Park-Line Walstroom App. For now we ask that you always request a mooring via the Harbour Masters at haven@arnhem.nl

Please note: If you do not use the Park-Line Aqua App we will add an additional 50.00 euro administration cost to your invoice !!

Waste Water Disposal

In the Nieuwe Kade (NK4) is the waste water station. Here you can discharge your black water (sewage) and graywater (waste water from showers, sinks, laundries and kitchens). Please ask the harbourmaster for permission to use the station. This service is free of charge. There is an information film available here: <http://havenarnhem.hbbh.nl/vuil-water-afgeven-nu-mogelijk>

Parking Nieuwe Havenweg

Lines along the side of the road have now been added on the Nieuwe Havenweg. Please ensure that you park your vehicle within the boundaries of these lines so as not to inhibit or block the free movement of other road users. This applies especially to large vans and lorries delivering supplies to ships etc, make sure you stay within the lines. On the opposite side of the road, gravel has been placed which allows ample parking facilities.

Containers

Containers may only be ordered and placed after permission has been granted from Harbour Services. There is a municipality fee payable for placement of a container, and a weekly fee.

Please note:

Open containers are strictly forbidden !! - This is to ensure that rubbish and other litter does not get blown into the harbour or river.

The container must have red/white reflection strips !! This is requirement as the result of a deadly collision that happened recently.
